

# GYPSUM RECYCLING

## PLASTERBOARD RECYCLING SERVICE

# WHAT IS IT?

At Saint-Gobain Gyproc, we believe in the reduction of waste on site. We accomplish this by collaborating closely with you by designing efficient systems and solutions that yield minimal waste. Furthermore, we offer on-site training to prevent any unnecessary waste.

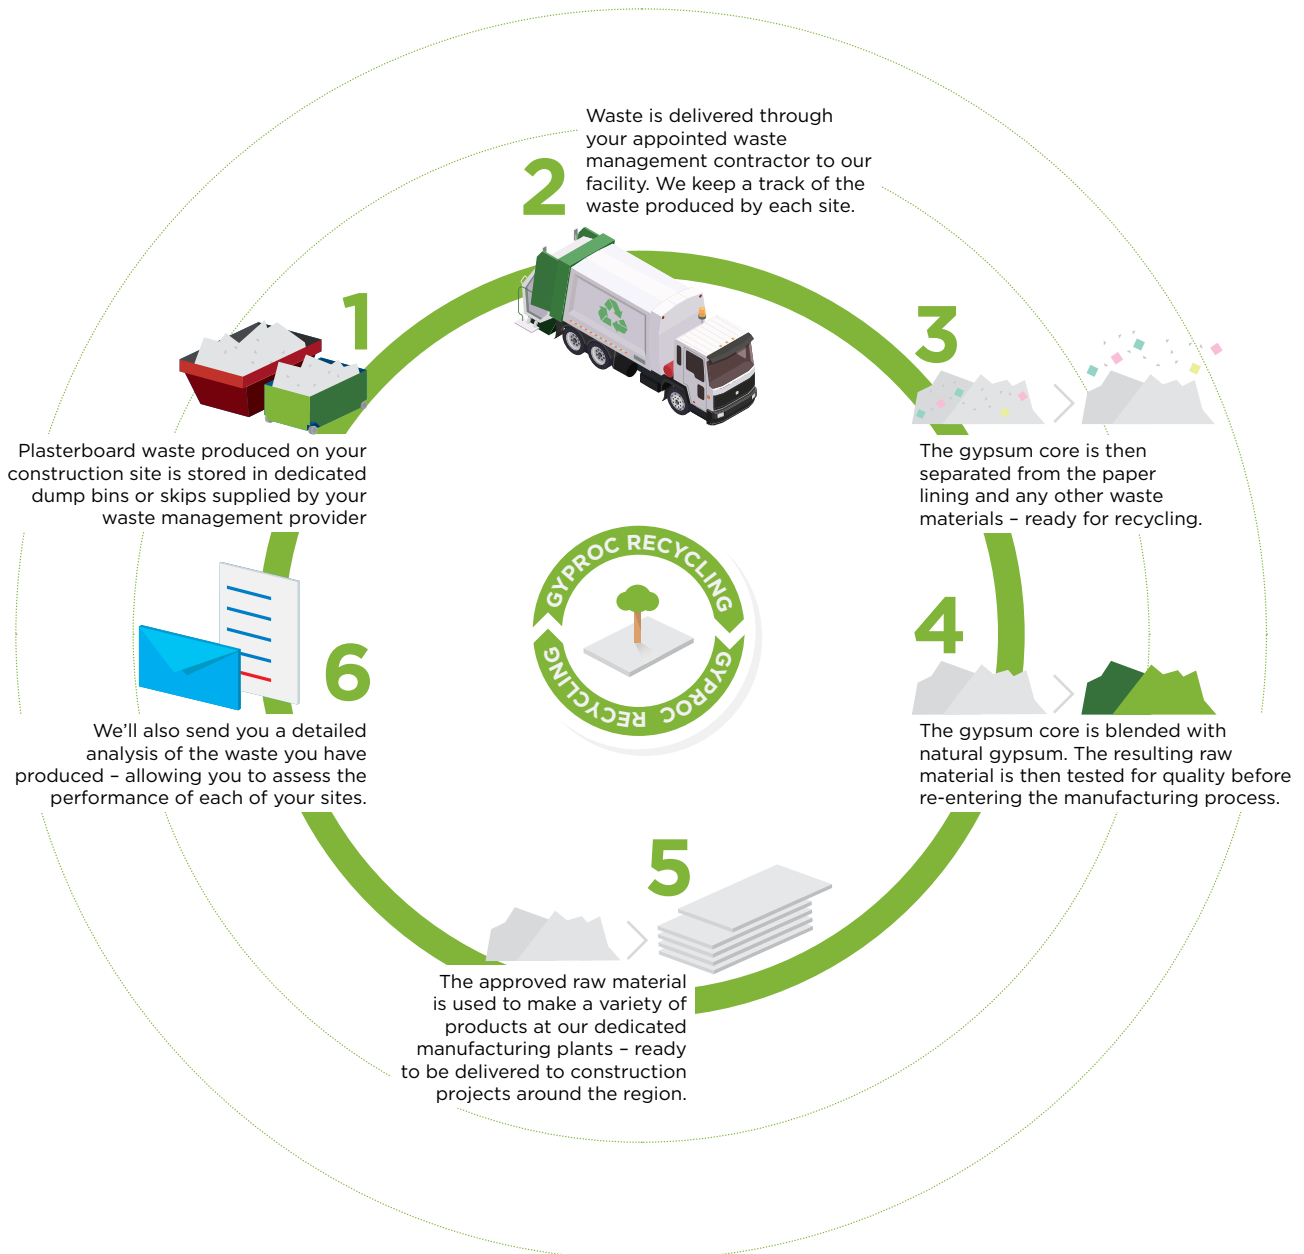

In situations where waste is unavoidable, we at Saint-Gobain Gyproc are here to provide comprehensive support. As the exclusive plasterboard manufacturer in the United Arab Emirates, we hold a permit that authorizes us to receive and recycle plasterboard waste, thanks to our association with Tadweer.

Masdar City, Abu Dhabi - UAE

New York University, Abu Dhabi - UAE

**Your  
success is  
our success**

## WHAT TO DO?

### STEP 1

Appoint waste contractor to transport segregated plasterboard waste.

### STEP 2

Transporter to deliver segregated, clean waste to our facility in suitable waste skip trucks.

### STEP 3

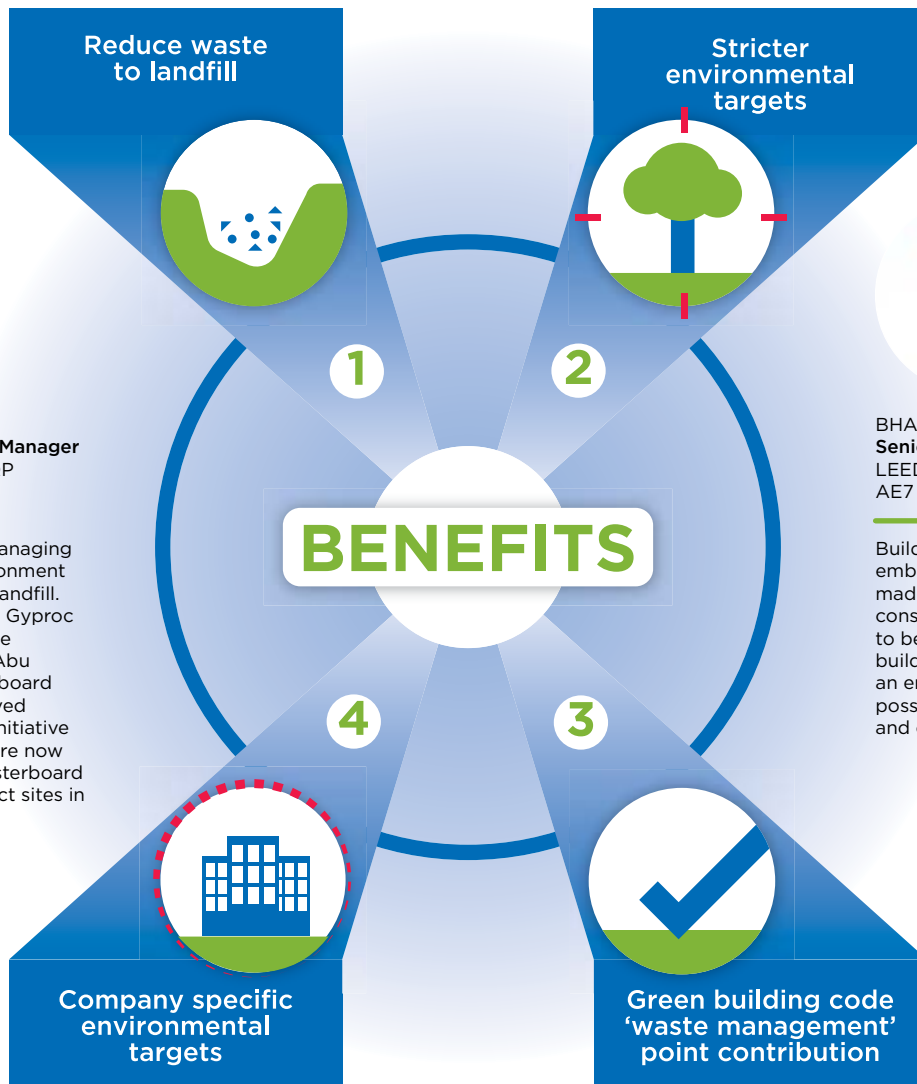

Gyproc will provide regular reports on quality of waste recycled.

# WHY?

**HARI KISHAN MEKA**  
Regional Sustainability Manager  
LEED® GA, Estidama PQP  
AI Futtaim Carillion LLC

We are committed to managing our impact on the environment and reducing waste-to-landfill. We have partnered with Gyproc and the Centre for Waste Management (CWM) - Abu Dhabi to recycle plasterboard through the only approved plasterboard recycling initiative in the Middle East. We are now looking at recycling plasterboard waste from all our project sites in the UAE.

**BHARAT HARWANI**  
Senior Architect  
LEED AP (BD+C), PQP  
AE7

Buildings are a stockpile of embodied energy and every step made to boost environmentally-conscious construction is to be lauded. A sustainable building should leave as small an environmental footprint as possible, both in its construction and over its planned lifetime.

Every major green building code has a requirement that each project diverts a percentage of construction waste from landfills to recycling initiatives. Points are awarded, measured in either volume or weight, for up to 50% of waste being recycled, with double the points available for up to 75%. By offering a recycling solution, Gyproc now contributes to your achievement of these targets.

For more information on the points available, please check the points calculators for the following local schemes:
