

gyptone[®] e'Sens Quattro 4mm

**DEMOUNTABLE AND
ACOUSTIC TILE WITH SQUARE
PERFORATION**

Characteristics

SUSTAINABILITY

Gyptone acoustic ceilings are composed of gypsum and paperliner, both of which are recyclable materials and can be recycled after use.

INSTALLATION

Gyptone tiles are suitable for all standard exposed grid systems.

SURFACE

Gyptone Quattro 4mm comes pre-painted in white.

MAINTENANCE

Repainting should be carried out using a short-haired roller. Avoid spray-painting the tiles, as this can negatively affect sound absorption.

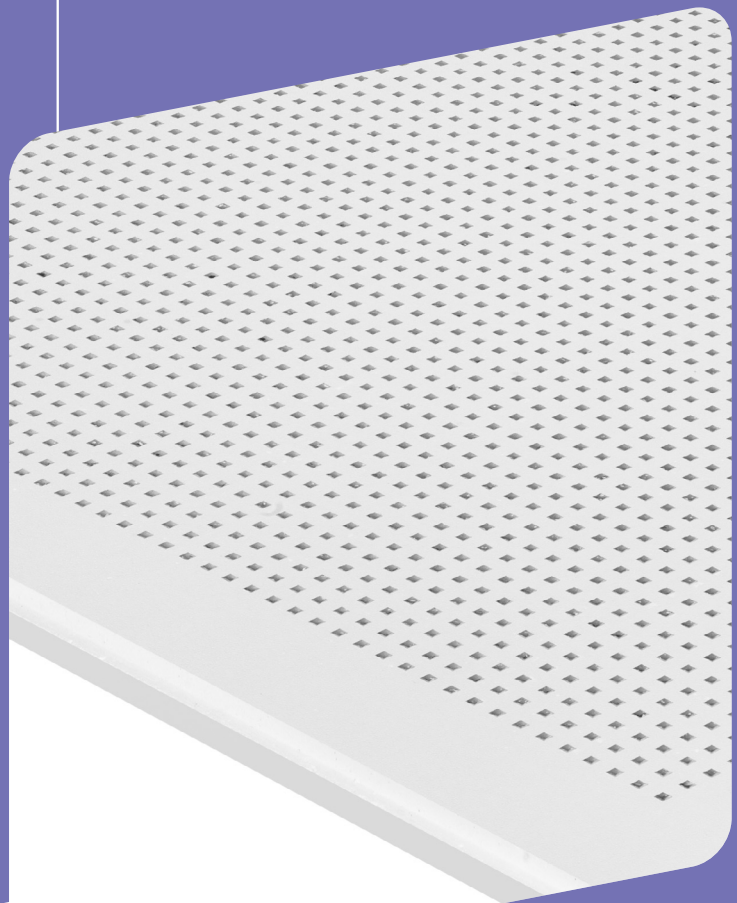

CLEANING

Gyptone tiles can be cleaned with a damp cloth. Most standard cleaning agents can be used.

The Gyptone acoustic ceiling range improves the acoustic environment with optimized reverberation time and improved speech intelligibility in any given room.

The Gyptone range includes various perforation designs with multiple edge options, offering durable, low-maintenance surfaces with a long lifespan and minimal maintenance costs.

Gyptone acoustic ceilings are made from natural materials, free from harmful substances, and are fully recyclable.

Gyptone® e'Sens Quattro 4mm

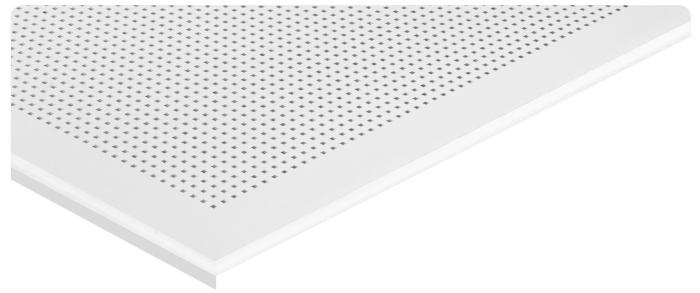

Edge A:
Exposed T-15 grid, Exposed T-24 grid
Demountable/Prepainted

Edge E15:
Exposed, recessed T-15 grid
Demountable/Prepainted

PLENUM mm	MINERAL WOOL INSULATION	α_w VALUE	NRC VALUE
200	none	0.40	0.55
	50mm ISOVER Eco APR	0.55	0.80
400	none	0.45	0.50
	50mm ISOVER Eco APR	0.55	0.75

TECHNICAL DATA	VALUE
Edge	A & E15
Modular size	600x600mm
Actual size	595x595mm
Thickness	12.5mm
Weight	10-10.5kg/m ²
Colour	White
Fire performance	A2-s1, d0 (Reference standard: EN 14190)

ACOUSTIC PROPERTIES

The acoustic measurements meet the requirements of ISO 354. The sound absorption is affected by construction height and by any mineral wool installed behind them.
