

Environmental & Site Risk Policy Statement

Saint-Gobain Gyproc's is committed to operate in a manner that maximizes our contribution to sustainable development, demonstrate continuous improvement in environmental performance, reduce environmental impacts and prevent pollution. To ensure that the company's objectives are achieved, an environmental management system will be employed at each operational site.

Saint-Gobain Gyproc is also committed to ensure in compliance with the conditions stipulated below:

- Effectively implement and maintain an environmental management system (EMS) that complies with ISO 14001:2015 standard and other International environmental regulations.
- Maintain compliance with EAD (Environmental Agency, Abu Dhabi) regulations and other applicable local and national environmental regulations.
- Monitor and control emissions and discharges to ensure that it is always within the limit specified by Regulatory Authorities.
- Strive to prevent and minimize environmental pollution wherever possible through source reduction, reuse, and recycling.
- Dispose, where preventive measures may not be possible, of all wastes by legal and safe method.
- Seek to minimize the consumption of energy, water, and other natural resources.
- Establish reasonable and achievable environmental objectives and targets as an element of annual budget planning processes.
- Establish and maintain programs to enhance environmental awareness for all employees, and to enhance employees understanding of the environmental aspects related to their individual work assignment.
- Conduct regular environmental assessments and make recommendations for continues improvements.
- Correct promptly any practices or conditions not in compliance with this policy.
- Earning the confidence of shareholders, stakeholders, society and other involved parties through its contribution to sustainable development, while becoming environmentally competitive in the industrial sector;
- Achieve Saint-Gobain Environmental Objectives, Sustainability Roadmap 2030 and Neutral Carbon Emission 2050.

Saint-Gobain Gyproc will document, implement and review this policy periodically to ensure that continual improvement in performance is achieved and sustained. The same will be communicated to all company employees as well as to regulatory agencies, the public, or other interested parties upon request.
