

Develop knowledge and practical skills in the construction of metal framed partition systems

Level 1 GypWall CLASSIC 2 Day Course

The course includes

- The importance of Health & Safety, including method statements and risk assessments
- Reasons for using this type of partition
- Identifying and selecting the correct components
- Understanding plans prior to setting out and installing the metal stud framework
- Extracting relevant information from a construction drawing
- Understanding basic setting out procedures, configuration and sequence
- Correct installation of floor channels and forming doorways

- Correct installation of head track / deflection head details
- Installation procedures and fixing centers for the metal framework
- How to correctly form a doorway
- How to incorporate services
- How to extend and box Gyproc 'C' studs
- The selection and fixing of Gyproc plasterboard
- Understanding and using the Gyproc literature

Suitability

No formal entry requirements but this course is a must for anyone working in internal finishing.

Training Method

Extensive practical work with one to one guidance from the instructor. A recapping knowledge quiz will be given at the end of the course.

Programme

The duration of actual practical training undertaken on each day will be a minimum of 6 hours.

At the end of the course trainees will receive a Certificate of Attendance from Saint-Gobain Gyproc.
